

NEW PRODUCT ANNOUNCEMENT HAWK 7 MOTOR

Auburn WA October 2024 We are pleased to announce the release of our updated Hawk 7 Motor. The Hawk 7 Motor is the Industry standard FK sized motor used in more racing programs worldwide than all other motors combined. We have spent nearly a year working with a team of engineers at our factory to update the Hawk 7 and address some of the issues based on feedback we have received from track owners, dealers, and the racing community. We have accomplished our goals without any significant speed increase or decrease of the motor. This will allow previous generation motors to continue to be run and raced against the newest version without a performance advantage or penalty. If you're happy with the motor you are running it will not be necessary to change it to remain competitive.

Track Tested

During the redevelopment process we track tested production samples to ensure the changes we made resulted in real world results, not just theoretical bench testing on a power supply. We did this for each significant change to ensure we got the results we wanted.

Project Goals

- Decrease DOA / failure rate
- Eliminate 2-Speed/2-Step
- Make Danny Zona Love Us
- Ensure changes allow new and old motors to run together seamlessly (no significant speed increase / decrease)
- Reduce required break-in time, in most cases, break-in is no longer necessary.

Motor Recall

We stand behind our products: JK Products will gladly replace at no charge any previous generation M7 motor that is still in its original / unopened blister card package. Simply return any new / unopened motor to the place it was purchased for a replacement. Offer valid through December 31, 2024. (Dealers can return them to distributors, or directly to us for exchange. please contact us for more information)

Thank you for your support

I would like to personally thank the slot car community for their support over the years, as well as the raceway owners and racers that were involved in the testing and reintroduction of this motor.

Support your local Raceway

We rely on a network of raceways throughout the world that support and sell our product line. Ensure you always have a local track to race at by purchasing parts from your local Raceway.
